RATIO-PAK HSS QUAD

3000

Ratio - Pak HSS Quad 3000

With up to 3000ml capacity, the Ratio Pak HSS Quad 3000 is perfect for larger volume two component spray, foam and metering and mix dispense applications. Utilising the popular Ratio-Pak two component cartridges to reliably proportion two component materials, the patent pending Quad provides for a significant increase in capacity (up to 3000ml) and ratios (from 1:1 to 100 to 1). Compared to hand held HSS air guns, the Quad provides increased capacity, increased in field productivity, enhanced flexibility and dispense control with less operator fatigue.

The high quality, light weight Quad base unit is easily carried or wheeled into place. The improved ergonomic spray hand gun is light in weight and provides full control of highly reactive two component materials with minimal clean up and waste. Fluid delivery hoses and air line are bundled together for enhanced mobility, flexibility and for reaching into tight spots.

User friendly features include a larger wheel base for platform stability, accurate air and material flow control, dump and bleed valves and easy to use cartridge change out procedures. All connections for A and B components are labeled and colour coded to ensure proper set up and replacement. Detailed instruction booklets are included.

HSS recommended materials: Polyurethanes, Polyureas, epoxy, silicone, foams, acrylics, urea hybrids and polyesters.

Potential Coating Applications

- Truck bed liners; motor home and trailer roof & floor coatings
- Van & truck conversion interior coating and waterproofing
- Abrasion - resistant liners and coatings
- Industrial equipment liners and coatings
- Aircraft touchup and maintenance coatings
- Built-up roofing coating repair and touchup
- Roof leak repair and sealing of HVAC openings
- Manhole and underground vault sealing and waterproofing
- Railroad and truck trailer liners and coatings
- Pool and deck coatings, liner repairs and pipe joint repairs
- Pipe and pipeline coatings, insulative foams and leak repair
- Secondary containment coatings and leak repairs
- Zoo and environmental theme park coatings and special effects
- Marine and deck coatings; slip resistant coatings
- Decorative pond and planter waterproof coatings and liners
- Waterproofing and leak repair for small boats and watercraft
- Water storage tank liner and liner touchup
- Waterproofing and decorative concrete coatings
- Parking garage leak repairs
- Abrasion - resistant coatings and liners
- Soft floor coatings
- Architectural coating and shape covering
- Implement coatings
- Insulation foam coatings
- Door and panel spray adhesives
- Moisture and sound deadening coatings
- Traffic safety markings and coatings and trade show booth coatings
- Dock and flotation coatings and waterproofing
- Amusement and theme coatings
- Military equipment coatings and waterproofing
- Fuel and solvent tank liners and coatings
- Spray foams, hard coats and sealants
- Chemical lab compound evaluations
- Silicone moulds and Animatronics
- Stage scenery
